

Alexander Sytov

Business Automation & Web Systems Engineer

Websites, dashboards, integrations and AI workflows for business

I build websites, dashboards and automation systems that connect leads, CRM, data, APIs and AI into one working business process. I help business owners connect landing pages, corporate websites, CRM, Google Sheets, Telegram, APIs and AI tools into practical systems that reduce manual work and improve visibility.

EXPERIENCE

SEPTEMBER 2024 - PRESENT

Freelance Developer (Automation)

- Built cross-posting automation for Instagram content adaptation, media processing via Cloudinary, and scheduling to 5-10 social networks through the PostMyPost API.
- Managed routing and prompts through a Google Sheets interface; reduced distribution time from 2 hours to 15 minutes per material.
- Created StyleWeaver, a SaaS-style app mockup and product experiment.

MAY 2024 - SEPTEMBER 2024

Low-Code Developer - Nedvex

- Created a Telegram bot on n8n that helps 50+ agents select real estate lots daily.
- Implemented lot filtering logic from XML exports and analytics for user actions.
- Delivered 10+ successful automation projects for the company.

MAY 2022 - MAY 2024

Freelance Developer & .NET Engineer

- Built the backend for HashtagHelp, a SaaS service for automatic hashtag funnel generation.
- Designed REST API, database structure and integrations with Google services using ASP.NET Core and MySQL.

SEPTEMBER 2020 - JULY 2022

Electronics Engineer, Embedded Software Developer

- Developed prototypes of electronic devices and programmed microcontrollers in C.

EDUCATION

Computer Science and Engineering

Moscow Technical University of Communications and Informatics. Graduated in 2024.

SERVICES

Landing pages for offers and lead generation
Corporate websites with trust-building structure
Dashboards for metrics and internal reporting
CRM, Telegram, Sheets and API integrations
AI assistants and workflow automation
